

IEC NATIONAL PRESENTS

Foreman Training for the Electrical Trade SPARK Pre-Conference Training

Foreman Training is a 2-day skill development program that teaches journeymen and new foremen how to effectively lead crews and jobs.

Join us before SPARK to gain an understanding of what foremen do, practice skills, and leave with practical tools to apply on the job immediately.

Program Objectives:

- Identify hard and soft skills necessary to effectively perform electrical Foreman duties
- Evaluate skillset to determine current strengths and weaknesses as a foreman/potential foreman
- Complete skill-development activities to develop and expand foremanship skills

Example Topics:

- Leadership
- Time Management
- Operational & Interval Planning
- Jobsite Organization, Documentation, & Safety

Session Focus:

- Foreman Role
- Job Cycle
- Job Execution
- Outcomes

Eligibility:

Participants in this program must meet the following criteria:

- Active in the electrical industry
- Minimum two years experience as an Electrician
- Currently working as:
 - Journeyman
 - Lead Electrician
 - Service Tech
 - Other role overseeing a small electrical project
- All participants need to bring a laptop with Wi-Fi connectivity.
- Program materials will be accessed online using Microsoft SharePoint, Word, and Excel.
